Gavin Newsom's unelected board of climate bureaucrats is out of control. They just approved new regulations that will increase gas prices by as much as 65 cents per gallon in 2025.

With gas prices in California already \$1.40 above the national average, commuters could pay up to \$2 more at the pump than those in other states.

Newsom would rather pick fights with politicians in Washington, DC than fix problems here at home.

The only gas he cares about is his own hot air.
